### **DETAILED ACTION**

This is a response to Applicant's Remarks filed on January 14, 2009.

Claims 1-10, 13-14, 17-22, and 27-39, and 43-60 are currently pending.

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Please cancel claims 47-48.

Authorization for this examiner's amendment was given in a telephone interview with the Applicant's Representative, James Hallenbeck, on February 6, 2009. As explained to Mr Hallenbeck, the subject matter of the instant claims was not immediately seen to be described in the instant disclosure.

### ***Allowable Subject Matter***

1. Claims 1-10, 13-14, 17-22, 27-39, 43-46, 49-60 are allowed.
2. The following is an examiner's statement of reasons for allowance:  
Applicant's invention is directed to a system and method for managing network traffic flow by processing network traffic for content desired to be detected and preventing such content to reach the end users.  
Claim 1 or 19 is an embodiment of managing the network traffic flow with dual processors. A first processor performs routing of network traffic content based on a prescribed protocol that is related to a prescribed type of a network traffic content. The

Art Unit: 2432

first processor stores the network traffic content that matches the prescribed protocol into a stack for further processing/scanning for content desired to be detected by a second processor. Furthermore, the first processor performs filtering of the network traffic content that does not match the prescribed type. Canion [US 2002/0108059 A1], and Trcka [US 6453345 B2] do not teach these particular limitations.

Claim 27 or 30 is an aspect of the Applicant's embodiment and is directed to a specific process of routing network traffic content for scanning before reaching an end user. It involves a first processor flagging network content for scanning. Instead of the original content being sent for scanning to a second processor when flagged, a copy of the network traffic content is sent to the second processor. Canion [US 2002/0108059 A1], and Trcka [US 6453345 B2] do not teach these particular limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
